Insectopedia by Hugh Raffles, Paperback | Barnes & Noble®

Insectopedia is an intriguing study of the human world through its relationships with insects. Why do we have such a visceral revulsion to cockroaches, but not (for example) ladybugs? What does the intricate communication methods of bees (physical movement), pine beetles (auditory), and ants (chemical) say about our verbal language?

Insectopedia by Hugh Raffles - Goodreads

About Insectopedia. A New York Times Notable Book A stunningly original exploration of the ties that bind us to the beautiful, ancient, astoundingly accomplished, largely unknown, and unfathomably different species with whom we share the world.

Insectopedia is a fantastic collection of poems and beautiful paintings by Douglas Florian. The insect world may give some the creeps, but as a science teacher I was delighted at the skillful way this author described each of the insects "special" features leading for discussion and deeper understanding of each insect.
