
Storage Guava Fruit Osmotic Air Dehydrated

effect of osmotic dehydration on quality and shelf-life of ... - drying or osmotic dehydration and the dehydrated slices are pulverized to obtain guava fruit powder which is a good source of vitamin c. it freezes exceptionally well and the frozen product is practically indistinguishable from fresh fruit. drying and dehydration is the removal of majority of water **drying, storage and osmotic conditioning of psidium ...** - germination and seedling development. sour guava seeds exhibited an orthodox response to de-siccation tolerance and storage. seed germination and seedling growth were reduced with in-creased osmotic potential of osmoconditioning. however, conditioning of 10 days increased the seeds germination and optimized the average germination time to 20 days. **effect of process parameters on osmotic dehydration of ...** - commercial fruit in india in area and production after mango, banana and citrus. at present it occupies nearly 0.15 million ha of land with production of 1.80 million tons and productivity 12t/ha fruit per year in india. in india, guava is grown in bihar, andhra pradesh, uttar pradesh, gujarat, maharashtra and karnataka on large scale [2]. **osmotic dehydration process for preservation of fruits and ...** - osmotic dehydration has received greater attention in recent years as an effective method for preservation of fruits and vegetables. being a simple process, it facilitates processing of fruits and vegetables such as banana, sapota, fig, guava, pineapple, apple mango, grapes, carrots, pumpkins, etc. with retention of initial fruit **impact of gamma irradiation and osmotic dehydration on ...** - osmotic dehydration as a best process hurdle can be ascribed to two aspects. it is a low temperature water removal process and hence, minimum loss of color and flavour retention is more when sugar syrup is used as an osmotic agent (islam and flink, 1982). guava is considered as common man's fruit and **influence of osmotic agents on drying behavior and product ...** - characteristics of osmotic dehydrated guava slices ... influence of osmotic agents on drying behavior and product quality of guava fruit 207 statistical analysis the influence of osmotic agents and their ... degradation in moisture content of osmosed guava slices after 45 days storage at ambient temperature 25 ± 20 c. **studies on different treatments on osmotic dehydrated ...** - the aim of this study was to evaluate the effect of osmotic dehydration of guava slice. the present investigation entitled "studies on different treatments on osmotic dehydrated allahabad safeda guava slice (psidium guajava)" was carried out in the post harvest laboratory of **effect of size reduction on osmotic dehydration of guava** - in the process of osmotic dehydration, calculations of water loss, sugar gain and mass reduction was carried out which is shown in following equations respectively [15] . water loss (wl): the water loss is defined as the ratio of the net water loss of the guava fruit to the initial weight of guava fruit which is calculated as, **influence of processing methods and storage on physico ...** - influence of processing methods and storage on physico-chemical and antioxidant properties of guava jam abstract the present research was conducted to investigate the influence of different processing methods and ingredient mixing techniques to judge storage stability and consumer acceptability of guava jam. **physicochemical characteristics of guava "paluma ...** - guava (psidium guajava l.) is a highly perishable fruit with intense metabolic activity after harvest, and so, new preservation methods are needed. however, like any fresh product, the presence of enzymes, microorganisms, and other agents make the "paluma" guava consumption restricted to a short period of time and susceptible to degradation. **physical and chemical changes in guava raisin (psidium ...** - the osmotic dehydration pre-treatment is used to partially reduce the fruit initial water content, before convective drying. purpose of the present work is to investigate the influence of osmotic treatment followed by convective drying on the physicochemical parameters of guava slices. **"studies on effect of sulphur compounds on osmotically ...** - keywords: guava, osmotic dehydration, tray drying, drying characteristics, sulphur compounds. 1. introduction india is one of the largest producers of the guava fruit (psidium guajava l.) in the world. guava is an important fruit crop of india and called the "apple of the tropics". improved packaging technology and storage **abstracts of the ph. d. thesis submitted - jau** - packaging and storage studies on fresh guava fruit and osmotic-air dehydrated powder of guava (psidium guajava l.) name of student major advisor dineshkumar k. antala dr. a. k. varshney india is one of the largest producers of the guava fruit (psidium guajava l.) in **study on dehydration of papaya slices using osmotic ...** - profile of dehydrated fruit and affect their sensory acceptability. moazzam (2012) studied on the osmotic dehydration technique for fruit preservation and reported that osmotic dehydration is an operation used for the partial removal of water from plant tissue by immersion in an osmotic solution. **m. tech and ph. d theses of processing & food engineering ...** - packaging and storage studies on fresh guava fruit and osmotic-air dehydrated powder of guava (psidium guajava l.) (2010) student: dineshkumar k. antala advisor: dr. a. k. varshney abstract india is one of the largest producers of the guava fruit (psidium guajava l.) in the world.
