## Strong Coulomb Correlations Electronic Structure

**effect of coulomb correlations on the electronic structure of pucoga5 - share and discover research** - effect of coulomb correlations on the electronic structure of pucoga 5 alexander b. shick and va ´clav janis´ institute of physics, academy of sciences of the czech republic, na slovanice 2, cz ... **evidence for weak electronic correlations in iron pnictides** - evidence for weak electronic correlations in iron pnictides ... clusters to highlight the expected role of strong coulomb correlations, and it is shown that spectral features related to ... peaks often provide detailed information on the electronic structure of the unoccupied 3d states shown in figs. 1 a , **strong correlations from hund's coupling - arxiv** - abstract strong electronic correlations are often associated with the proximity of a mott insulating state. in recent years however, it has become increasingly clear that the hund's rule coupling (intra-atomic exchange) is responsible for strong correlations in multi-orbital metallic materials which are not close to a mott insulator. **strong coulomb correlation effects in zno - folk.uio** - strong coulomb correlation effects in zno ... indicating that strong coulomb correlations are in operation. furthermore, it is found that holes ... proper description of the electronic structure of zno. the lda+u approach [20, 21] was used to correct the strong correlation of the zn-3d electrons. this approach uses **weak and strong electronic correlations in fe superconductors** - electronic correlations are indeed triggered by electron-electron interactions but in a multi-orbital context they are in a highly nontrivial relation to the coulomb repulsion and hund's coupling strengths. this means that the local coulomb interaction energy  $u$  (of which hund's  $j$  is a fraction) is likely not larger than the bandwidth, **condensed matter physics internal strain tunes electronic correlations on the nanoscale - advancesinmag** - internal strain tunes electronic correlations on the nanoscale ... in correlated electron materials, however, the electrons may become localized because of strong coulomb interactions, resulting in an insulating state. despite considerable progress in the last decades, elucidating the driving mechanisms that suppress metallic charge ... **evidence for weak electronic correlations in fe-pnictides** - these strong satellites and spread out spectral weights have not been observed in recent x-ray absorption (xas) measurements at the oxygen k-edge in 1111, setting an upper bound on the effective coulomb parameter  $u \sim 1$  ev.18,19,20 absorption and emission studies on the fe l2,3 edges also are in agreement with weak electronic corre-
